Profits tax for the period		
- Hong Kong	2,491	1,430
- Overseas	142	-
Deferred taxation	-	1,000
	2,633	2,430

Hong Kong profits tax has been provided at the rate of 17.5% on the Company's estimated assessable profits for the six months ended 30 June 2007. Taxation on overseas profits has been calculated on the estimated assessable profit for the year at the rates of taxation prevailing in the countries in which the Group operates.

The Group did not have any significant unprovided deferred taxation for the period.

6. Share options

As at 30 June 2007, the Company had a share option scheme for eligible employees of the Group. Details of the share options outstanding during the period were as follows:

	<u>Number of share options</u>
Outstanding at the beginning of the period	2,974,000
Granted during the period	-
Forfeited during the period	-
Exercised during the period	(1,476,000)
Expired during the period	-
	<hr/>
Outstanding at the end of the period	1,498,000
	<hr/>

In accordance with HKFRS 2 Share-based Payments, fair value of share options granted to employees determined at the date of grant is expensed over the vesting period, with a corresponding adjustment to the Group's share option reserve.

The closing price of the shares of HK\$0.20 each of the Company quoted on the Growth Enterprise Market of the Stock Exchange on 30 June 2003, 14 May 2004, 8 December 2004 and 6 July 2005, being the business date immediately before the date on which share options were granted, was HK\$0.24, HK\$0.28, HK\$0.43 and HK\$0.75 respectively.

The weighted average closing price of the Company's shares quoted on the Stock Exchange immediately before the dates on which the options were exercised was approximately HK\$1.76.

The following assumptions were used to calculate the fair values of share options:

<u>Date of grant</u>	7/7/2005	9/12/2004	17/5/2004	2/7/2003
Expected volatility (based on the annualized historical volatility of the closing price of the shares in the Company from 1 July 2000 to the date of grant)	80.80%	77.90%	80.52%	74.33%
Expected life (in years)	5	5	5	5
Risk-free interest rate (being the approximate yield of 5-year Exchange Fund on the grant date)	3.32%	2.68%	3.77%	2.95%
Expected dividend yield	Nil	Nil	Nil	Nil

The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share price. Because changes in subjective input assumptions can materially affect the fair value estimate, in the director's opinion, the existing model does not necessarily provide a reliable single measure of fair value of the share options.

7. Earnings per share

The calculation of the basic and diluted earnings per share is based on the following data:

BUSINESS REVIEW

ADVERTISING BUSINESS

Recruitment advertising

Recruitment advertising revenue reported a drop of 2% for the first half of the year. The print recruitment advertising market had become increasingly mature with tough competition. To cope with the keen competition, the Group continues to offer flexible advertising packages with unique value-added products to both recruiters and job seekers to enhance their recruitment results, which other competitors will find difficult to replicate.

1010job in Shanghai has continued to contribute turnover to the Group in the first six months of 2007. Although the deficit incurred in this business has narrowed due to increased sales, the business is still operating at a loss. The competitive environment in the print media business in Shanghai has not changed significantly over the period under review. The Group continues to confront the problem of having to compete head to head with the largest recruitment media operator (both print and online) in the nation. Whilst a variety of tactics have been employed with a view to gaining market share and improving profitability, it remains a challenge to achieve the desired results.

Inflight magazine advertising

Inflight magazine advertising division reported sales growth of 40% for the first half of the year. The success of the inflight magazine business is largely dependent on the China economy. The Group has benefited considerably as a result of the double digit growth in the economy of China over the past few years, including the exceptional buoyancy experienced during first six months of 2007. The anticipated substantial growth in demand for advertising space before the Olympic Games, especially in major airline inflight magazines, has helped to raise advertising yields and as a result, the Group’s profitability will be enhanced.

PRINTING BUSINESS

During the period under review, the Group has endeavoured to enlarge its customer base geographically and has successfully introduced its services to some of the world's most prestigious publishers. The printing division reported a sales growth of 35% for the first half of the year. The Group is gradually building up its reputation as a trusted book printer which offers quality together with competitive pricing. The investment in time and money to enlarge market share have adversely impacted upon profitability of the division and resulted in a HK\$1 million operating loss. Nevertheless, the Group foresees that with established long-term relationships, the Group will be able to improve its financial performance through increasing printing orders and implementing cost control measures. To cope with the increase in printing volume, the Group will further expand its production capacity in the second half of the year through internal resources.

INVESTMENT

The Group reported investment income of approximately HK\$0.3 million in the first half of 2007, compared with HK\$0.4 million in the same period last year. It is expected that securities market will be volatile in the second half of this year and the performance from investing activities will be under pressure in the second half. To ease the financial impact from the volatile market, the Group continues to adopt a conservative approach for its investment strategy.

PROSPECTS

For the six months ended 30 June 2007, the Group has achieved growth in both revenue and operating profit. The Group migrated from the GEM to the Main Board by way of introduction on 23 July 2007. The successful migration is an important milestone in the Group's corporate development.

In its recruitment business, the Group will look at improving the effectiveness of the distribution network for its print recruitment publication. The Group will in particular focus on the online side of the business by enhancing its website to make this more user friendly and better adapted to cater for the changing needs and customer expectations of internet advertising. The Group foresees that its inflight magazine business will continue to gather momentum for the remainder of 2007. The Group has managed to maintain a healthy financial position to finance any future business development, including an increase in production capacity in its printing business. Although the second half of 2007 may prove to be challenging due to increasing competition in some of the Group's business sectors, the Group hopes to identify some exciting growth opportunities which it intends to actively pursue.

LIQUIDITY AND FINANCIAL RESOURCES

During the first half of 2007, the Group had paid 2006 final and special dividend to shareholders of approximately HK\$21 million and paid capital expenditure of approximately HK\$6.1 million. As at 30 June 2007, the Group had bank and cash balances of approximately HK\$66.3 million (31/12/2006: HK\$55.2 million). The Group had finance lease liabilities of HK\$15.6 million (31/12/2006: HK\$17.4 million).

The finance lease facilities are at floating interest rates. All borrowings are denominated in Hong Kong dollars. The Group's gearing ratio as at 30 June 2007 was 7.9% (31/12/2006: 9.3%), which is calculated on the basis of the Group's total interest bearing debts over the total equity interest as at the reporting date.

The Group's trading transactions were mainly denominated in Hong Kong dollars, United States dollars, Australian dollars, British pounds and Renminbi. The Group had used forward exchange contracts to hedge its foreign currency exposure in trading activities when considered appropriate. The Group adopts a centralized treasury policies in cash and financial management and reviews its liquidity and financing requirements regularly.
